[3942]

A03-09-045 - Sierra Pacific Power Company (Sierra).

This decision grants Sierra's application pursuant to Public Utilities Code § 851 to sell its four run-of-the-river hydroelectric generating plants on the Truckee River to the Truckee Meadows Water Authority. The sale of these electric generating plants is authorized by statute, and is in the public interest. Further, there will be no adverse environmental impact as a result of the sale. The Commission defers a decision on treatment of Sierra's gain on sale. This proceeding is closed.

R93-04-003 - Rulemaking on the Commission's own motion to govern open access to bottleneck services and establish a framework for network architecture development of dominant carrier networks.

I93-04-002, R95-04-043, I95-04-044 - Related matters. This decision grants the March 9, 2004 Petition of Pacific Bell Telephone Company, dba SBC California, to modify the 271 Decision by suspending the performance incentives plan doubling mechanism, set forth in Ordering Paragraphs 10-14 of the 271 Decision, until such time as the review of the performance incentives plan can be resumed and completed. Until the review resumes and is completed, the decision directs SBC California to continue to track and record the data for any continuing extended chronic failures so that Staff can closely monitor the company's performance to ensure that no backsliding occurs.

ALTERNATE TO ITEM 3899

A00-11-056, A00-10-028 - Related matters. This alternate decision adopts the same allocation methodology as the Proposed Decision. DWR's revenue requirement is the same in this alternate as in the Proposed Decision. The alternate decision departs from ALJ Allen's draft decision by describing the \$290 million in excess monies the Energy Division has identified DWR would overcollect given its current revenue requirement.

A03-10-022 - Southern California Edison Company (SCE).

This decision adopts a joint SCE and Office of Ratepayer Advocates (ORA) recommendation to reduce the Energy Resource Recovery Account by a net amount of \$3,574,000 to reconcile certain audit issues. In all other respects, the decision finds SCE's procurement related and other operations were reasonable for the record period September 1, 2001 through June 30, 2003. The decision also defines the scope and standard of review for least cost dispatch and orders SCE and ORA to implement a master data request process. This proceeding is closed.

A02-12-028, I03-03-016 - Related matters. This decision authorizes the base margin electric and gas revenue requirements for SoCalGas and San Diego Gas & Electric Company (SDG&E) in the consolidated applications for Test Year 2004 Cost of Service. The decision authorizes SoCalGas \$1,501 million in natural gas distribution revenues for Test Year 2004. The decision authorizes SDG&E \$776.097 million in electric distribution revenues and \$211.520 million in natural gas distribution revenues for Test Year 2004. It provides a reasonable level of revenue for monopoly distribution services that will in turn assure customers of safe, reliable and responsive service under conditions of prudent management, while also assuring the companies' opportunity to earn the authorized rate of return. This decision rejects proposed settlements for both applications.

The alternate adopts the agreement between the Greenlining Institute and the two utilities, which the Proposed Decision would reject. The alternate does not adopt the labor cost balancing account offered in the proposed decision and provides more detailed consideration of the merits of various labor forecasts.

ALTERNATE TO ITEM 3936

A02-12-028, I03-03-016 - Related matters. This alternate decision finds that the SoCalGas and SDG&E Settlements are generally reasonable in light of the whole record, consistent with the law, and in the public interest. The SoCalGas Settlement was unopposed and this alternate adopts the SoCalGas Settlement without change. The SDG&E Settlement was opposed by UCAN and the City of Chula Vista. This alternate makes two modifications to the SDG&E Settlement. This alternate disallows the Otay Mesa Pressure Betterment Project and adjusts SDG&E's portion of the San Onofre Nuclear Generating Station (SONGS) revenue to reflect the amount adopted in the Edison GRC, Decision 04-07-022, the proceeding in which the SONGS issues was litigated.

R03-03-017 - Order Instituting Rulemaking on the Commission's own motion to re-examine the underlying issues involved in the submetering discount for mobile home parks and to stay D01-08-040.

I03-03-018 - Related matters. Public Utilities Code § 739.5 requires mobile home park (MHP) owners, who provide electricity and/or natural gas to their tenants through a submetered distribution system, to charge their tenants at the same rate the serving utility charges for comparable service, and requires the serving utility to provide a discount to the MHP owner for providing such services. This decision requires the following: 1. The discount shall be set at the average cost that the utility would have incurred in providing comparable services to the tenant directly, which is avoided when the MHP is submetered. 2. The discount shall be determined in a general rate case, biennial cost allocation proceeding, or other similar proceeding (revenue requirement proceeding). Between such proceedings, the utilities shall include a proposed revision to the discount in any utility filing proposing a revision to residential rates if the change in residential rates, or the data upon which the rate change is based, is sufficient to change the discount. 3. Any proposed settlement or stipulation in a revenue requirement proceeding, that includes the discount, shall specify whether and how the discount is to be adjusted between such proceedings. 4. If the calculation of the discount and how the discount is to be adjusted between such proceedings is not specified in an adopted settlement or stipulation that includes the discount, the discount shall not be revised until the next such proceeding. 5. In any proceeding where the parties propose a settlement or stipulation that includes the discount, they shall specifically demonstrate that the proposed discount complies with § 739.5. 6. The discount shall be set as an amount per space per day. 7. The discount shall be calculated using a sampling method, or a marginal cost method. 8. Refunds shall be distributed to tenants pursuant to § 739.5(b), except that when the refunds by the utility are on a per-meter basis, the refunds to the tenants shall be on a per-submeter basis. 9. Whenever a utility issues a refund to MHP owners through a reduction in the utility bill that should be distributed to tenants, the utilities shall: (1) identify the refund amount on the bill, and (2) explain how tenant refunds are to be calculated. If refunds are issued to MHP owners other than through the bill, the utilities shall identify the refund as such, and explain how to calculate tenant refunds. 10. When a tenant of a submetered MHP contacts a utility concerning the bill provided by the MHP owner, the utility shall offer to provide information on how the tenant's bill should be calculated, and on programs for which the tenant may be eligible. The utility shall also refer the tenant to the Commission's Consumer Affairs Branch, for resolution of complaints. 11. In their next revenue requirement proceedings, the utilities shall provide an analysis of the feasibility of providing bill calculation services to MHP owners. 12. The motion, filed by the active parties on January 16, 2004, to establish a new proceeding to consider the issue of whether there are fair and reasonable ways to mitigate the cost to MHP owners of converting existing submetered systems to directly-metered service, is denied. This proceeding is closed.

R04-03-017 - Order Instituting Rulemaking regarding policies, procedures and incentives for distributed generation and distributed energy resources.

This decision adopts modifications to the Self Generation Incentive Program (SGIP), which provides incentives to businesses and individuals who invest in distributed generation. The Commission implements the provisions of Assembly Bill 1685, increases the annual SGIP budget to \$300 million through 2007, eliminates the maximum percentage payment limits, and reduces the incentive payment for Level 1 projects to \$3.00 per watt. The Commission retains the San Diego Regional Energy Office as a non-utility program administrator through 2007. The decision directs the SGIP program administrators to expand opportunities for public participation in three Working Group activities: developing a declining rebate schedule, an exit strategy, and a data release format.

ALTERNATE TO ITEM 3984

This alternate finds that new load of publicly-owned utilities should be granted an exception to the cost responsibility surcharges for Department of Water Resources power up to a specified limit, consistent with the basic reasoning in D03-07-028. The alternate modifies the findings in that decision slightly to allow for newly-formed publicly-owned utility customers to be eligible for the exception, so long as the utility meets certain criteria as defined in the alternate. On the issue of "bypass" or "transferred" load, the alternate is substantially similar to the ALJ's proposed decision.

This decision grants a certificate of public convenience and necessity to Blue Ridge authorizing it to offer limited facilities-based and resold local exchange services.

The decision here is related to settlement in an investigation involving a Blue Ridge affiliate, NOS Communications, Inc. (NOS), that the Commission conditionally approved in D04-06-017.

The instant decision finds on the basis of the application, a supplement filed in June 2004 and a brief hearing held in July 2004, that Blue Ridge is qualified to offer the proposed local exchange services, and that allegations against NOS of misleading practices in its marketing of long distance service are unlikely to recur with respect to Blue Ridge.

54 C02-11-011 - Telscape Communications, Inc. vs. Pacific Bell Telephone Company.

[4040]

This complaint, filed by Telscape Communications, Inc. (Telscape), in which AT&T Communications of California, Inc. (AT&T) and WorldCom, Inc. (MCI) have intervened, alleges that several policies and practices of defendant Pacific Bell Telephone Company (SBC-CA) with respect to the provision of local exchange telephone service (local voice service) are anticompetitive and discriminatory. This decision finds that SBC-CA's refusal to process orders for changing a customer's local voice service to that of a competitive local exchange carrier (CLEC) if the customer also subscribes to SBC Yahoo! DSL (SBC-CA's retail digital subscriber line (DSL) service) and, in some circumstances, other retail DSL service, violates Pub. Util. Code §§ 451 and 453(a). The decision further finds that the partial settlement entered into by AT&T, MCI, and SBC-CA to resolve allegations that SBC-CA has abused the winback process and encouraged incorrect accusations of slamming is reasonable in light of the whole record, consistent with law, and in the public interest. The decision therefore approves it. The decision further requires SBC-CA to extend its third-party verification process to include slamming allegations for residential local voice service. The decision concludes that Telscape has not demonstrated that its broad objections to the functioning of SBC-CA's operational support systems are well-founded, but the decision orders SBC-CA to remedy deficiencies in its treatment of certain non-recurring service order charges, in its handling of billing disputes with CLECs, and in its implementation of its Performance Incentives Plan.
